Day-trippers and domestic tourism

While domestic tourism could be seen as less glamorous and dramatic than international traffic flows, it has been more important to more people over a longer period. From the 1920s the rise of Florida as a destination for American tourists has been characterized by “snowbirds” from the northern and Midwestern states traveling a greater distance across the vast expanse of the United States than many European tourists travel internationally. Key phases in the pioneering development of tourism as a commercial phenomenon in Britain were driven by domestic demand and local journeys. European wars in the late 18th and early 19th centuries prompted the “discovery of Britain” and the rise

of the Lake District and Scottish Highlands as destinations for both the upper classes and the aspiring classes. The railways helped to open the seaside to working-class day-trippers and holidaymakers, especially in the last quarter of the 19th century. By 1914 Blackpool in Lancashire, the world's first working-class seaside resort, had around four million visitors per summer. Coney Island in Brooklyn, New York, had more visitors by this time, but most were day-trippers who came from and returned to locations elsewhere in the New York City area by train the same day. Domestic tourism is less visible in statistical terms and tends to be serviced by regional, local, and small family-run enterprises. The World Tourism Organization, which tries to count tourists globally, is more concerned with the international scene, but across the globe, and perhaps especially in Asia, domestic tourism remains much more important in numerical terms than the international version.

Money, money, money

Pound sterling, strictly speaking refers to basic currency unit of sterling, now the pound , which is the currency of the United Kingdom (UK).

The sign for the pound is £ (or rarely just "L"). Both symbols derive from *libra* , the Latin word for " pound ". The standard ISO 4217 currency code is **GBP** = Great Britain Pound.

The pound sterling is one of the worlds most widely traded currencies along with the United States dollar, the Japanese yen and the euro.

In the UK, in order to distinguish the unit of currency from the unit of weight, and perhaps from other units of currency that have the same name, a pound is sometimes referred to more formally as a *pound sterling* or sometimes simply *sterling* . The slang term *quid* is also substituted in informal conversation for "pound(s) sterling". The sterling was originally a name for a silver penny of 1/240 pound. In modern times the pound has replaced the

penny as the basic unit of currency as inflation has steadily eroded the value of the currency. Originally a silver penny had the purchasing power of slightly less than a modern pound.
